AI is rewriting how businesses operate, but few have turned it into performance.

For decades, we've helped the world's most complex organizations turn technology disruption into a compounding advantage.

And now, it's your turn.

New Realities. Familiar Territory.

Move your organization from what's next to meaningful action.

The gap between AI ambition and operational reality has never been wider. Closing it requires AI designed for the real world—built into the operation and run long after launch.

That's where the actual work is: orchestration, governance, and accountability for results, quarter after quarter. Almost nobody stays for the last part. We do.

ARTICLE

How Deployments Crumble Without a Strong Cybersecurity Strategy

> "The question is no longer whether businesses will evolve with AI, but how. Some will infuse AI into existing ways of working, while others will redesign work around it. Either path requires a partner with the expertise to help navigate complexity, scale adoption, and deliver real business outcomes.

Agentic Operating Framework™

Most organizations invest in AI without knowing what drives real ROI.

The Concentrix Agentic Operating Framework™ is built on decades of delivery experience. It covers the operating model, governance, and design decisions that determine whether AI performs in production or stalls after the pilot.

In three minutes, you can find out where you are now, how you compare to your industry, and where to focus first.

SOLUTIONS

The iX product suite

Placeholder standfirst introducing the suite in one or two sentences.

iX Suite™
iX Hello™
AI agents for customer engagement
iX Hero™
AI superpowers for advisors
iX Wisdom™
Intelligence engine for hyper-personalization

iX Hero™

Every tool on one screen, so advisors handle each interaction with AI alongside them.

- Instant answers in the flow of a call
- Less after-call work
- Insight back to the floor

Explore iX Hero →

iX Hello™

No-code AI assistants that lift employee productivity and the customer experience together.

- Built without engineering
- Multimodal by default
- Enterprise controls from day one

Explore iX Hello →

iX Wisdom™

Analyses and organises your data into insight that changes how you engage customers.
